

HOGUE KNIVES ANNOUNCES

# THE EXPLOIT<sup>®</sup>

## OUT THE FRONT AUTOMATIC

Henderson, NV – Striking feats spring to mind when wielding Hogue's new Exploit knife. The company is pleased to publicize their latest backbone trigger fire out the front automatic knife to consumers. "Inertia and kinetic energy drive the blade forward. When you listen to the sound of the Exploit's internal mechanisms working together, it speaks for our craftsmanship," described seasoned lead engineer Brian Zelus.

The Exploit's blade is cryogenically treated, hand sharpened and honed for impressive power and sturdiness. "We build specialized tooling for every knife we produce. Our line needed a knife with a slimmer frame without compromising quality, and I feel we've achieved that with flying colors," explained Scott Bruhns, head of production.

This knife is intended for frequent one-handed operation in close-proximity conditions. Its double action automatic trigger swiftly snaps with every deployment and retraction. With an ergonomic grasp of anodized 6061-T6 aluminum, you're ready for any endeavor.

Every Hogue knife is made in the USA and is backed by three generations of manufacturing expertise. Hogue's automatic knives are for sale to legally permitted users through authorized dealers only. For more information please call Hogue directly at 1-800-438-4747 or visit [www.hogueknives.com](http://www.hogueknives.com).
